

SAFESTART®

ToolBox Series 8 DVD SET

The SafeStart ToolBox Series DVDs will help you maximize the effectiveness of your SafeStart training. They are designed to provide you with a quick and easy method to solidify the concepts, sustain the learning, and improve your employees' critical error reduction techniques. They can easily be integrated into your regular safety talks following the completion of the core SafeStart training and help keep it fresh between subsequent sessions—like the Extended Application Units.

The SafeStart ToolBox Series consists of 40 short videos (8 DVDs with 5 videos on each, packaged together for your convenience). Each video lasts about 5 minutes and is designed to review the SafeStart concepts and techniques during a toolbox talk or tailgate session. After seeing a re-creation of an accident, the participants are asked to identify the safety practices that could have prevented this accident, the SafeStart states and errors that contributed to the accident and the Critical Error Reduction Techniques (CERTs) that may have prevented the accident. Also, the video ends with an “off the job” equivalent scenario. There is an instruction booklet that identifies the scenarios depicted, and the states, errors and CERTs that each video covers.

Full Program List

- Hand Tendons Cut by Grinder
- Crushed Fingers During Pipe Fabrication
- Bruises From Tripping Incident
- Arm Lacerations and Stitches From Grinder
- Asphyxiation After Welding
- Hand Puncture During Welding
- Chemical Burn on Hand
- Concussion While Pulling Cable
- Broken Finger From Tripping Incident
- Crushed Foot During Material Handling
- Crushed Finger Using Pry Bar
- Ankle Sprain From Tripping Incident
- Muscle Strain When Overreaching
- Electrical Shock While Troubleshooting
- Close Call: Falling Object Knocks Hardhat Off
- Back Strain From Fall Off Ladder
- Hand Laceration During Material Handling
- Back Sprain From Tripping Incident
- Lacerated Thumb From Grinder
- Close Call: Pickaxe Hits Buried Pipe
- Neck/Back Injury From Fall
- Sprained Ankle on Scaffold
- Muscle Strain From Pulling Wire
- Slip and Fall to Floor
- Broken Finger While Removing Scaffolding
- Vehicle Collision
- Sprained Ankle and Wrist From Trip and Fall
- Fire From Cutting Sparks
- Foot Puncture During Demolition
- Close Call: Cylinder Falls Off Cart
- Foreign Body in Eye While Grinding
- Hand Crushed With Sledge Hammer
- Close Call: Radiation Exposure
- Broken Fingers Stacking Scaffolding
- Contusion From Equipment Failure
- Close Call: Heat Exhaustion
- Asbestos Exposure
- Back Strain While Overreaching
- Electrical Shock
- High Pressure Spray During Line Breaking
